Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to an image sensor, classified in class 250, subclass 208.1.
 - II. Claims 9-29, drawn to an image sensor integrated type active matrix type display device, classified in class 349, subclass 151.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a facsimile, a copier, a video camera, or a digital still camera which does not include the particular elements of invention II. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to attorney Mark Muray (34225) on 6/21/04 to request an oral election to the restriction requirement, but did not result in an election being made.
